LIST NO. 312.

BY APPOINTMENT
TO
H.M. THE KING.

CLIBRANS' POCKET SEED GUIDE FOR 1912.

TO make easy the selection of the prettiest flowers and the choicest Vegetables, is the purpose of this little book. Concise cultural hints are given and each variety of plant is separately described. The difficulty sometimes experienced in selecting varieties from a long list is overcome in the present instance by including only those varieties of the greatest merit. We publish a larger, more comprehensive list than the present one; to those of our friends who would prefer the larger edition we will gladly supply a copy.

BUSINESS TERMS

CARRIAGE.—All Vegetable and Flower Seeds are sent *Post or Carriage Free* to any part of the United Kingdom. Potatoes and mushroom Spawn are *Carriage Free only when the order is of no less value than 20/-*

SPECIAL DISCOUNT.—If cash is sent with order, 5 per cent. (1/- in the £) may be deducted. We offer this as a special inducement to save cost of booking.

, [PEA—DUKE OF ALBANY.

[*Clibrans*

Owing to the long continued drought of last summer, crops of some varieties of peas are somewhat scarce. If, when ordering, customers would kindly give permission to substitute any varieties that may be out of stock, we should esteem it a favour.

CLIBRANS' GARDEN PEAS.

(*Pisum sativum*).

Any good, well drained, deeply worked soil is suitable for peas. Farm-yard manure should, as a rule, be given to the previous crop. On light soils, 2ozs. of Clibrans' Potash Manure to the square yard should be applied some days before the peas are sown; in every case the soil should receive a top dressing of Clibrans' Phosphate Manure, at the rate of 3 ozs. to the square yard just after sowing. Keep free from weeds and earth up twice during growth. For an early crop sow the earliest varieties in January. Early and second early varieties sow in February, and the main crops in succession from March until the end of May.

(Those marked with an asterisk (*) are wrinkled varieties).

EARLY CROP.

	Height	Per qt. s. d.
A1 , a fine early variety, of true marrowfat flavour, producing large pods of fine peas	3½ ft.	3 0
Ameer , an early green marrow, good cropper,	3½ ft.	2 6

CLIBRANS' MASTERPIECE, the earliest and finest dwarf pea yet introduced; a tremendous cropper, producing long dark green pods filled with peas of delicious flavour; of robust habit. A strikingly handsome pea and a valuable introduction. Height about 1½ ft. Per packet, 1/6.

* English Wonder , an excellent early pea of the finest flavour, and wonderfully productive	1½ ft.	2 9
* GRADUS , ripens with <i>William the First</i> , yet the pods are as large and as well-filled as those of <i>Duke of Albany</i> , with large peas of excellent flavour, a splendid variety	3 ft.	3 3
* THE PILOT , a first early pea, of exquisite flavour	3 ft.	3 3
THE SHERWOOD , a fine dwarf, producing an abundance of pods containing 8 to 10 large peas of delicious flavour	1 ft.	3 0

CLIBRANS' GARDEN PEAS—*continued.*

	Height.	Per qt. s. d.
* William Hurst , a splendid early blue wrinkled marrow, large, handsome, deep green, closely filled pods ..	1 ft.	2 9
William the First , <i>selected stock</i> , much superior to the ordinary strain usually sent out. An early green prolific marrow, fine flavour	3 ft.	2 6

SECOND AND GENERAL CROP.

* Alderman , a splendid main crop variety, of a strong and branching habit	5 ft.	3 0
* Boston Unrivalled , unusually prolific, a second early marrowfat of the best table qualities	3 ft.	3 0

CLIBRANS' EXHIBITOR, a superb variety of the highest excellence ; produces a heavy crop of handsome pods, mostly in pairs containing frequently as many as 12 peas in each ; excellent flavour .. Per pint, 2/- 4 ft. —

***CLIBRANS' MAIN CROP**.—A splendid main crop ; the haulm is strong and carries an enormous crop of large green peas which are exceedingly well filled 4 ft. 3 6

***Dr. McLean**, a fine blue wrinkled marrow, with large handsome, well-filled pods, fine flavour, vigorous grower, and very productive.. .. . 3 ft. 2 6

***Duchess**, a splendid exhibition main crop, green wrinkled variety, straight pods about 4 inches long, average of 9 peas in each, exquisite flavour, very prolific .. 5 ft. 2 9

***DUKE OF ALBANY**, a splendid main crop variety, with immense well-filled pods, delicious flavour, unrivalled for exhibition or the table 5 ft. 3 0

***Duke of York**, an earlier and dwarfer form of the *Duke of Albany*, possessing all its good qualities .. 3½ ft. 3 6

***KING EDWARD VII.**, a splendid second early marrow, of robust growth and a prolific cropper. The pods contain 8 to 10 large peas of fine flavour .. 1½ ft. 3 6

***Prince of Wales**, a very productive pea of excellent flavour ; splendid main crop variety.. .. . 3 ft. 2 3

CLIBRANS' GARDEN PEAS—*continued.*

	Height.	Per qt. s. d.
* Prize-winner , a superb marrowfat pea, producing an abundance of large, deep-green pods, well filled with fine peas of delicious flavour	3 ft.	2 6
QUITE CONTENT , a fine variety for exhibition, the pods measure from 7 to 7½ inches, and contain from 10 to 12 large peas of superb flavour.. .. .	per ½ plnt 1/6 5 ft.	
Rent-payer , a superior marrowfat variety, with long, straight, dark green pods	2 ft.	2 9
* Sharpe's Queen , sturdy branching habit, pods large and well filled; of delicate flavour	2½ ft.	2 9
* Stratagem , a fine marrow, enormous cropper, splendid flavour, large handsome pods	2 ft.	2 6
* Telephone , very productive, the pods are large and contain 10 to 12 peas of sugary flavour; fine for main crop and exhibition	5 ft.	2 9
THE BELL , a magnificent main-crop variety, with strong haulm and dark green foliage, producing an abundance of long straight pods in pairs, each containing 10 to 12 peas of immense size and exquisite flavour	4 ft.	3 0

FOR LATE CROP.

Autocrat , a large blue marrow pea; very prolific, of vigorous growth	4 ft.	2 6
* Late Queen , one of the best late peas, resists mildew in a remarkable manner	3½ ft.	3 0
* Ne Plus Ultra , first-class dark green wrinkled marrow, of excellent flavour; large pods, heavy cropper	6 ft.	2 6
* THE GLADSTONE , an excellent cropper, pods in pairs; haulm, pods and peas very dark green, pods very long, often containing 11 peas of large size in each, of fine flavour, very scarce	3½ ft.	3 0
* Yorkshire Hero , a productive marrow of fine flavour	3 ft.	2 0

CLIBRANS' BROAD BEANS.

(*Faba Vulgaris.*)

Sow at intervals from January to May, in rows 2 feet apart. As soon as the young pods show through the flowers at the bottom of the plants, the tops should be pinched out so that the plant may throw all its energy into the flowers already formed. A top dressing of 1½ ozs. of Clibrans' Phosphate Manure to the square yard will be found most effective.

Per qt.—s. d.

CLIBRANS' EXHIBITION LONGPOD.—The finest broad bean in cultivation, either for exhibition or table use ; the pods are an enormous size, and well filled with large fine-flavoured mellow beans ; very scarce per ½ pint, 1/- 3 0

Aquadulce, extra long pods ; early and fine for exhibition .. 1 3

Bunyard's Exhibition Longpod, handsome pods ; a very fine and productive variety.. .. 1 9

Bury Prize Longpod, extra large well-filled pods ; fine for exhibition 1 6

Green Longpod, rather earlier than *Green Windsor*, but not so large, rich green colour ; excellent flavour .. 1 3

Green Windsor, beautiful green colour when cooked .. 1 9

Harlington Windsor, very prolific, of good flavour, one of the best broad beans in cultivation 1 6

Johnson's Wonderful or Monarch Longpod, very productive and of superior flavour ; fine for general use .. 1 0

Seville Longpod, early, pods very long ; dwarf habit .. 1 4

EXHIBITORS AND GROWERS

are invited to note the unique series of honours recently gained by our Exhibits of Vegetables. Brief particulars of these will be found on page 2. These honours bear eloquent testimony to the product of our Seeds.

Mr. A. Morris, Wightwick, writes : August, 1911.
" Your garden seeds have turned out well and defied the dry weather. The peas have been grand."

CLIBRANS' FRENCH or KIDNEY BEANS.

(*Phascolus Vulgaris*.)

Sow in drills 18 inches, or 2 feet apart, the poorer the soil the closer the rows may be planted. Place the seeds 2 inches deep with the eye downward, and 6 inches apart. Sowings may be made from the end of April to July.

FRENCH BEAN—NE PLUS ULTRA.

	Per qt.	s.	d.
Canadian Wonder , prolific, fine for exhibition and main crop ..	1	6	
CLIBRANS' ENGLISH WONDER. A wonderfully productive second early of strong growth; the pods resemble in form <i>Canadian Wonder</i> , but are longer, more fleshy, and of better flavour Per pint, 2/6			
Everbearing , very productive, dwarf and bushy ..	1	6	
Golden Butter , or Wax-Podded , pods rich yellow, thick and fleshy, quite stringless, excellent flavour ..	2	6	
Monster Negro Longpodded , selected, prolific and early ..	1	6	
Ne Plus Ultra , dwarf, compact habit, early, and forces well ..	1	6	
Woods' Centenary Golden Podded , prolific; beautiful golden-yellow pods, quite stringless, fine flavour ..	1	9	

CLIBRANS' RUNNER BEANS.

(*Phaseolus Multiflorus.*)

Sow in drills 3 or 4 feet apart, from May to July, placing the seeds with the eye downwards, 2 inches deep and 6 inches apart in the rows ; pinch off the tops when the plants are in full flower. A dressing of equal parts of Clibrans' Phosphate and Potash Manures at the rate of 2 ozs. to the square yard will produce the best results.

Per qt.—s. d.

CLIBRANS' EXHIBITION.—The pods of this grand variety are produced in clusters, and are of immense size, very thick and fleshy ; they are extremely handsome, free from coarseness, and of excellent quality. Unequalled for exhibition Per packet, 2/-

Champion Runner, an improvement both in size and productiveness on the old *Scarlet Runner* 3 0

Climbing French, or "**Tender and True**," combines the best features of *Dwarf French* and *Scarlet Runner*. Pods long and narrow, produced in great abundance 3 6

Giant White, very long pods ; abundant cropper 2 0

Scarlet Emperor, a splendid exhibition variety, the pods often reaching 15 inches in length. Per pkt., 1/6 ; per pint, 3/- —

Scarlet Runner, a standard variety, fine for general crop Per pint, 1/6 2 9

The Czar, a white-seeded variety, producing enormous thick fleshy pods, from 12 to 16 inches in length 3 0

The Rev. C. T. Salisbury, Llangibby, writes :—

August 10th, 1911.

"I took First Prize this week at Caerleon Show for vegetables grown from your seeds."

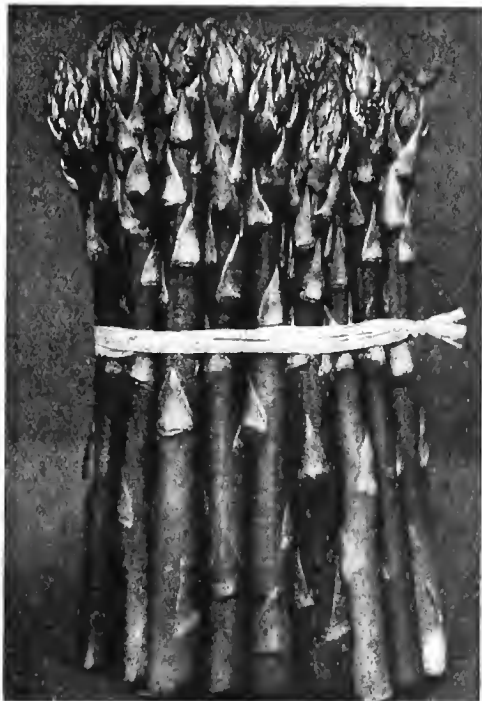

Mr. J. Thompson, The Gardens, Hensol Castle, writes :—

"I have much pleasure in letting you know that the Peas you supplied have turned out a great success. We first picked on June 11th, from seed sown outdoors the first week in March. The pods averaged 16 pairs per plant, each pod containing 9 or 10 peas of splendid quality."

CLIBRANS' ASPARAGUS.

(*Asparagus officinalis*).

Sow in March and April; in the following Spring transplant into beds prepared by trenching the ground 3 feet deep, mixing about 12 inches thick of well rotted manure with a good proportion of broken bones and salt with the soil. In Winter give protection.

Photo]

ASPARAGUS.

[Clibrans

Per lb. s. d. oz. s. d.

Argenteuil Early Purple , grows to an immense size	3	0	0	4				
— Gollath , a new variety of French origin, quite as early as the <i>Argenteuil</i> , but develops larger and finer heads; will be largely grown when it becomes known				
per pkt., 1 -	-	-	-	-				
Connover's Colossal , early, large, grand quality	..	3	0	0	4			
Palmetto , earlier, larger, and more prolific than the ordinary kinds, its pea-green heads being of delicious flavour	3	0	0	4

CLIBRANS' BEET *(Beta vulgaris)*.

Sow in May in drills 12 to 18 inches apart and 1 inch deep, on light soil that has been enriched by previous treatment. When the plants have made 3 or 4 leaves they should be thinned out to 9 inches apart.

Photo]

BEET—"CLIBRANS' GLOBE."

[Clibrans

Per oz.—s. d.

CLIBRANS' EXHIBITION BLACK.—A superb variety, roots of finest form, almost black; delicate flavour; the finest of all for exhibition and general use Per pkt. 6d. and 1/- —

CLIBRANS' IMPROVED RED GLOBE, of rapid growth, maturing earlier than any other variety; globular shape, smooth, deep blood-red, sweet and delicate .. Per pkt. 6d. and 1/- —

Dell's Superb Black, medium size, deep colour, dark bronze-coloured foliage, fine for table and bedding purposes .. 1 0

Egyptian, or Turnip-rooted, a select variety .. 0 6

"CLIBRANS"
WHITE."**

Photo by Clibrans.

CLIBRANS' CELERY—*continued.*

Sow thinly in a slight hot-bed from February to April. The plants should be well hardened off, and may be planted out in rows from the end of April till the end of June. Two ounces of Clibrans' Nitrogen Manure to the running yard will be found of considerable service.

RED VARIETIES.

CLIBRANS' RED.—This valuable variety still holds the premier position. The stalks are very solid, crisp, juicy, of a fine nutty flavour, per pkt. 1/-

Leicester Red, very crisp, fine nutty flavour, per pkt. 3d. and 6d.

Standard Bearer, splendid red variety, compact habit; grows to a heavy weight, and remains long in perfection, per pkt. 3d. and 6d.

Wright's Grove Red, large and crisp, dwarf, fine flavour, per pkt. 6d.

PINK VARIETIES.

CLIBRANS' PINK.—This grand variety, after many years of careful selection, now stands unrivalled, either for table use or exhibition; it is large, solid, of a delicate pink colour, very crisp and brittle; of very rapid growth, per pkt. 1/-

Wright's Grove Pink, a splendid bright pink; sweet and crisp, per pkt. 6d

WHITE VARIETIES.

CLIBRANS' WHITE.—The best white Celery ever offered. It grows to a large size, is very solid and crisp. As an exhibition variety it is unequalled, per pkt. 1/-

Early Market.—This variety is described by the raiser as the earliest and best market celery yet sent out, per pkt, 1/-

Wright's Giant White, heads very large, solid and crisp, with a fine nutty flavour, per pkt. 6d.

Celery Seed, for flavouring soups, per oz. 3d., per lb. 1/6

CELERIAC.

Turnip-rooted Celery.—The root makes a delicious salad when boiled like a turnip. The root and young leaves are valuable for flavouring soups, &c., per pkt. 6d.

CLIBRANS' CAULIFLOWER

(*Brassica Oleracea Botrytis Cauliflora*).

EARLY CAULIFLOWER.

Sow the first and third weeks in August for spring and summer use, and from February to May for autumn cutting. Those sown in August should be pricked into a frame or under a hand-glass during the winter; in spring plant out in rows 2 feet apart, and 18 inches apart in the rows, in good soil.

CLIBRANS' EARLY GEM.—For very early forcing this valuable variety is unequalled, producing pure white heads earlier and dwarfer than any other Cauliflower

	Per pkt.	Per oz.
	s. d.	s. d.
Early Snowball , an invaluable dwarf variety ..	1 6	—
Early London , compact, early, fine white heads 6d. and	1 0	1 6
Early Dwarf Erfurt , or Mammoth , large and compact	1 0	2 0
Improved Autumn Giant , invaluable late variety 6d. and	1 0	1 6
Walcheren , best for general crop .. 6d. and	1 0	1 6

CUCUMBER

(*Cucumis sativus*).

The seed may be sown from January to April for summer use, and in September for spring use. The temperature of the seed bed should range from 75 to 85 degrees; a rich loamy soil suits them best.

	Per pkt.—s. d.
CLIBRANS' DEFIANCE. —A new variety that has so far proved itself quite immune from disease. The fruit is of good length, dark green and of fine form, produced in abundance; the habit is compact, short jointed with small leaves..	1 0
CLIBRANS' PRIZEWINNER. —A particularly fine selection that we have been perfecting for several seasons; the fruit is smooth, of good length, fine shape, and dark green colour, excellent cropper..	1 6

CLIBRANS' [CUCUMBER—continued.

	Per pkt.—s. d.	
CLIBRANS' CROPPER , rich deep green of regular form, solid crisp well-flavoured flesh ; good grower and bearer ..	1	6
Every Day .—Handsome shape, prolific, fine flavour ..	1	0
Lockle's Perfection , prolific and handsome exhibition variety ..	1	0
Rochford's Market , very prolific ; well-known variety ..	1	0
Telegraph , prolific, one of the best for general cultivation ..	1	0

Wonderful , the heart is solid and of immense size	0	6	1 0

Photo]

LETTUCE—"CLIBRANS' CHAMPION."

[Clibrans

CLIBRANS' MELONS (*Cucumis melo*).

Sow from January to June in pots plunged in a hot-bed, the temperature of which should not be less than 80 degrees. When the plants have made four or five leaves, plant out in a hot-bed or house, the temperature being kept at 75 to 85 degrees.

Per pkt.—s. d.

CLIBRANS' LORD DERBY. —A handsome scarlet-flesh variety, oval shape, and beautifully netted	1	0
Hero of Lockinge , white flesh, superior flavour, productive ..	1	0
Munro's Little Health , a very prolific scarlet-flesh variety ..	1	0
Royal Sovereign , flesh white, tinted green, slightly netted ..	1	0
Superlative —A handsome scarlet-flesh variety of delicious flavour; medium size, rounded form, prettily netted; robust grower, free setter	1	0

ONION (*Allium cepa*)

Onions require a deep, rich, heavy soil. The seed should be sown early in March for winter, and in August for summer use.

VARIETIES FOR SPRING SOWING.

ONION—AILSA CRAIG.

CLIBRANS' EXHIBITION. A magnificent variety, producing heavy crops of large handsome bulbs; either for exhibition or use we consider this variety unequalled. The flavour is excellent, and it is a good keeper. It has been a feature in our "Gold Medal" groups, and has gained a great reputation with gardeners

generally. Per pkt. 1/6

CLIBRANS' ONION.—Varieties for Spring Sowing—*continued.*

	Per oz.—s. d.
Ailsa Craig , one of the best onions in cultivation. Per pkt. 1/- —	
Ailsa Craig , ordinary stock	2 0
Banbury Improved , immense size, fine for exhibition	0 9
Bedfordshire Champion , very large, fine	0 10
Brown Portugal , large flat variety, of mild flavour	0 9
Cranston's Excelsior , one of the best for exhibition, per pkt. 6d. & 1/- —	
Cranston's Excelsior , ordinary stock	2 0
James' Keeping , large and fine, strong flavour, pear-shaped	0 9

VARIETIES FOR AUTUMN SOWING.

CLIBRANS' LARGE RED ITALIAN.—The largest Tripoli Onion

In cultivation, very mild flavour, heavy cropper; fine for exhibition

	1 0
Tripoli, Globe Red , deep red in colour, of mild flavour	0 10
Tripoli, Giant Rocca , large brown-skinned variety	0 9
White Lisbon , a very mild hardy and early variety	0 8
Mixed , the best varieties for autumn sowing	0 9

Mr. J. A. Hall, The Gardens, Shiplake Court, Henley-on-Thames, writes:

"I have a fine crop of your 'Exhibition' Onion, though they are not quite so large as they were a year or two ago; still, considering the weather we have had, they are a very fine lot of shapely excellent bulbs. I have two other well-known varieties in the same bed, but your 'Exhibition' onion is easily the best."

CLIBRANS' PARSLEY

(*Carum Petroselinum*).

Sow in March or April in rich soil ; thin out to 9 inches apart.

At the Royal Horticultural Society's Exhibition, in London, on Sept. 13th, 1910, we were awarded a Certificate of Cultural Excellence for Plants of our "Exhibition" Parsley.

	Per oz.	s.	d.

H.M. THE KING.

CLIBRANS'

"GOLD MEDAL"

Vegetable Plants for Exhibitors.

To be a successful exhibitor of Vegetables, you must have the best plants of the best strains. This is what we offer you.

We Guarantee all the plants offered on this page are of the same strains and grown under the same conditions as those displayed in our many "Gold Medal" Exhibits referred to on page 2.

The strong sturdy plants are grown specially for Exhibition purposes, and are ready for sending out about the middle of May.

To prevent disappointment, owing to the increased demand, we respectfully request that orders should be booked early in February.

The following varieties can be supplied:

			PER SCORE.
LEEK, Clibrans' Exhibition	In Pots.		
.. Clibrans' Lyon ...	2/- & 3/-		
.. Dobbie's Champion	per doz. ;		
ONION, Clibrans' Exhibit'n	or from		
.. Clibrans' Selected	Boxes,		
.. Ailsa Craig ...	1/-		
.. Cranston's Excelsior	per doz.

.. Clibrans' Dwarf Green		6d.
.. Curled		6d.
BORECOLE, Clibrans' Exhibit'n		6d.
TOMATOES, in variety, 4d. each ;		per doz., 3/-	

ENSURE SUCCESS BY GETTING THE BEST PLANTS.

FOR ORDINARY VEGETABLE PLANTS :: :: SEE OPPOSITE PAGE.

Clibrans' Vegetable Plants for the Kitchen Garden.

FROM the number of orders we receive season by season it is evident that many people do not find it convenient to raise their own plants from seed. There are also those who find, when planting-time arrives, that they have space for, and require more plants than they have raised.

It is to meet these requirements that the plants on this page are offered. All are strong, healthy, of the best strains, and with ordinary care and attention should give every satisfaction. We do, however, strongly advise those of our clients whose aim is the Exhibition Table, to order from the list given on the opposite page.

We can supply as follows:

	WHEN READY.
CAULIFLOWER, Early London and Waleheren. } Strong plants, 6d. per score; Extra strong, 8d. } per score }	Second week in April to first week in May.
CABBAGE, CURLED GREENS, SAVOYS, } BRUSSEL SPROUTS, in leading varieties. } 3d. per score; 1/- per 100; 7/6 per 1,000 ... }	Throughout the year — subject to weather permitt'g.
CABBAGE (Red), LETTUCE (Cos and Cabbage). } 4d. per score; 1/6 per 100 }	Throughout the year —subject to weather.
BROCCOLI. 6d. per score; 2/- per 100	June onwards.
ONIONS and LEEKS. Spring sown, from seed beds. 9d. per score; 3/- per 100... ..	May onwards.
CELERY (Red, White and Pink). 4d. per score; } 1/6 per 100. Extra selected plants, 6d. per score; } 2/- per 100 }	Second week in May onwards.
PARSLEY. 9d. per score; 3/- per 100	Second week in May onwards.
TOMATOES, in variety, and VEGETABLE } MARROWS. 4d. each, 3/- per doz. }	Spring and early summer.
CUCUMBERS, MELONS and ORNAMENTAL } GOURDS. 6d. each, 5/- per doz. }	Spring and early summer.

VEGETABLE PLANTS FOR EXHIBITION PURPOSES. SEE OPPOSITE PAGE.

Clibrans' Superb Mixtures of Dwarf Evergreen Lawn Grass Seed

For Lawns, Bowling Greens, Tennis Courts, Cricket Grounds, &c.

HINTS ON FORMING A LAWN.—The best way to make a Lawn is by sowing seed. By this means a perfectly level plot may be secured. If the soil is free from weeds, and perfectly clean seed is used, the result is better, and the cost less, than if turf is laid. The ground should be well trenched, and if very poor a supply of manure worked in. Level and roll with a heavy roller, raking over between each rolling to ensure an even surface. Sow from the beginning of April, but not later than September. 1 lb. will sow about 20 square yards. The seed should be lightly raked into the ground, and afterwards rolled.

FOR GARDEN, TENNIS, AND CROQUET LAWNS

These Mixtures contain the finest varieties, and will produce that velvety green sward so greatly desired.

EXTRA FINE MIXTURE (WITH RYE GRASS) per lb., 1/6 ;
per cwt., 157/-

FINE MIXTURE—per lb., 1/- ; per cwt., 105/-

WITHOUT RYE GRASS—per lb., 1/6 and 1/8 ; per cwt.,
157/- and 175/-

FOR TOWN SOWING

A Special Mixture of Grasses which, from long experience, are found to survive in the neighbourhood of smoky towns, &c.

EXTRA FINE DWARF EVERGREEN MIXTURE—per lb., 1/6 ;
per cwt., 157/-

ORDINARY MIXTURE—per lb., 1/- ; per cwt., 105/-

FOR UNDER TREES

Per lb., 1/8 ; per cwt., 175/-

FOR BOWLING GREENS

Per lb., 1/6

CLOVER, WHITE DUTCH. Extra quality for Lawns, 1 6 per lb.

- **Pink**, per pkt., 1/-
- **Crimson**, per pkt., 1/-
- **Flesh**, per pkt., 1/-
- **White**, per pkt., 1/-

Asters—Clibrans' Superb Prize—cont.

Sinensis. Elegant branching bushes about 15 inches high ; produce an abundance of large handsome flowers, 3 to 4 inches across. Strongly recommended for cutting and border plants.

— **Dark Violet, Violet, Pink, Apple Blossom, Pale Mauve.**

Per pkt., 6d.

ASTER SINENSIS.

	Per pkt.	s.	d.
ABRONIA, Umbellata , h.h.a., pretty trailing plant with fragrant flowers of a rosy-lilac colour	0	3	
ACACIA, Lophantha , g.p., handsome yellow flowers, with fern-like foliage	0	6	
— Mixed , choice varieties	0	6	
ACONITUM (Monk's Hood) , h.p., free flowering, easily grown, hardy plants. Mixed colours	0	6	
AGROCLINUM (see Everlastings, page 91).			
ADONIS, Flos , h.a., bright scarlet, a charming variety ..	1 ft.	0	3
— Vernalls , h.p., beautiful large star-shaped flowers of a clear buttercup-yellow, suitable for borders and rockwork. ..	1 ft.	0	3
AGERATUM , h.h.a., summer bedding plants requiring sunny position.			
— Imperial Dwarf , blue	6 in.	0	6
Little Dorrit , azure-blue	6 in.	0	6
— Mexicanum Little Blue Star , very dwarf and compact, not more than 4 to 5 inches high, colour bright pale blue. ..	1	0	
— White Gem , very dwarf and compact, pure white variety ..	0	6	

CLIBRANS' SELECTED FLOWER SEEDS—continued.

Per pkt.—s. d.

AGROSTEMMA, coronaria, h.p., deep red 2½ ft. 0 3

— **atrosanguinea**, h.p., dark red with silvery foliage .. 2½ ft. 0 3

ALYSSUM, Saxatile compacta, h.p., bright golden-yellow, splendid
for early spring flowering 6 in. 0 6

— **Procumbens (White Carpet)**, very dwarf creeping habit .. 0 6

— **Sweet**, h.a., white, very free flowering 0 3

ANEMONE Coronaria, h.p., single poppy anemone, choice mixed 0 6

— **Fulgens**, scarlet windflower 1 0

— **St. Brigid**, large handsome blooms in a great variety of colours 1 0

ANTIRRHINUM (Snapdragon), h.p., very showy free-flowering
plants, specially suitable for summer bedding.

TOM THUMB VARIETIES.

CLIBRANS' SCARLET, dazzling scarlet. Per pkt. 1/-

CLIBRANS' ROSE, a charming shade of bright rose. Per pkt. 1/-

CLIBRANS' WHITE, pure white. Per pkt. 1/-

CLIBRANS' YELLOW, a beautiful clear yellow. Per pkt. 1/-

CLIBRANS' MIXED, a splendid mixture of the purest and richest
colours. Per pkt. 6d. and 1/-

"Eclipse."—Golden leaved, dark crimson flowers. Per pkt. 6d.

Queen of the North, 1 foot, densely covered with large white flowers.
Per pkt. 6d.

INTERMEDIATE VARIETIES.

CLIBRANS' CRIMSON QUEEN.—A fine richly coloured dark self.
Per pkt., 6d. and 1/-

CLIBRANS' SALMON QUEEN.—Brilliant orange scarlet. Per pkt.,
6d. and 1/-

CLIBRANS' WHITE QUEEN.—A fine large-flowered white. Per
pkt., 6d. and 1/-

CLIBRANS' YELLOW QUEEN.—Clear soft yellow, a lovely colour.
Per pkt., 6d. and 1/-

CLIBRANS' ANTIRRHINUM (Snapdragon)—continued.

LARGE FLOWERED VARIETIES.

(*A. majus grandiflorum*).

CLIBRANS' BRILLIANT, brilliant carmine colour. Per pkt., 6d.
and 1/-

**ALBUM FLORE
PLENO.**

A striking new departure in Snapdragons. From the mouth of the flower, between the upper and lower lips, peculiarly shaped petals are produced, as shown in the illustration, giving the bloom an appearance of being double. The flowers are large and produced in long fine spikes. For bedding and cutting this new variety will find a ready welcome. Per pkt., 1/-

Queen Victoria.—Elegant finely-cut foliage, and unusually large flowers of a brilliant white. Per pkt., 6d.

Venus.—A lovely pink on a white ground, with a pure white throat. Per pkt., 1/-

Choice Mixed.—A fine selection of the best coloured and largest flowered forms of the tall-growing varieties. Per pkt., 6d.

LANDSCAPE WORK.

We have every facility and are fully prepared to give expert advice, submit plans, estimates, &c., for all classes of Landscape work. We undertake the formation of new or the remodelling of existing grounds, the formation of Roekeries, Ornamental Lakes, Grottos, Pergolas, Ferneries; the laying-out, furnishing, &c., of Winter Gardens, and all other work of allied character. Correspondence invited.

Calceolaria :

Clibrans' "Gold Medal" Strain. g.p.

Per pkt.—s. d.

HERBACEOUS, CLIBRANS' "GOLD MEDAL" STRAIN.

This strain represents the ideal in these flowers, and is unequalled. The plants are of dwarf, strong, healthy, sturdy habit, producing enormous flowers of the richest and most varied colour, ranging in the selfs from pale buff-yellow to intense crimson, whilst others are richly spotted in a great variety of colour ; the blooms are of good substance and well distended.

— Cholcest Mixed 1/6 and 2 6

— **HYBRIDA CORNUTA, CLIBRANS' SUPERB STRAIN.** A unique and beautiful form. On each side of the flower the dorsal petal forms a horn-like projection of the same colour and texture as the rest of the flower. This gives them a pleasing and attractive appearance.

— Cholcest Mixed 1/6 and 2 6

Shrubby Bedding Varieties, extra choice, mixed .. 1 6

CALENDULA (*English Marigold*), h.a. Very hardy showy annuals.

— **Officinalis**, fl. pl., **Favourite**, sulphur and white .. 1 ft. 0 3

— Dwarf, early-flowering, mixed	3d. and 0 6

Cyclamen :

Clibrans' "Gold Medal" Strain. G.P.

Our strain of Cyclamen is remarkable for the large size and splendid substance of the flowers, together with their purity and richness of colour. The plants are of robust habit, wonderfully free-flowering, carrying their blooms erect on stout stems. The handsome foliage is beautifully marbled with grey. The strain generally is admittedly unequalled. For Winter and Spring effect Cyclamen are perhaps the most useful of all greenhouse plants.

CLIBRANS' GIANT CRIMSON. A magnificent flower ; so intense is the colour that the flowers have a decided black shading.

Per pkt. 2 6

SALMON. A great favourite, the colour being a clear rich salmon ; under artificial light the effect is delightful. Per pkt. 2 6

WHITE. The largest flower of all ; snowy-white. Per pkt. 2 6

WHITE, TIPPED ROSE. Quite distinct from above ; the base of the flower is a charming rose colour, whilst the remainder is purest white. Per pkt. 2 6

CHOICEST MIXED. A superb mixture. Per pkt. 1 6 and 2 6

PAPILIO (*Butterfly Cyclamen*). A charming type, distinguished by their petals being frilled and fringed, giving them an attractive appearance. The various shades of colour are well represented.

Per pkt. 2 6

CLIBRANS' SELECTED FLOWER SEEDS—continued.

Per pkt.—s. d.

GERBERA JAMESONI HYBRIDA.

These new Hybrid forms have been obtained by crossing and re-crossing *G. Jamesoni* and other species, with marvellous results. The flowers are of large size, star-like in form, with a glorious richness and delicacy of colour in a wide range of tints, varying from pure white through yellow, orange, salmon, rose, and ruby, to violet. The plants are free in growth and bloom. As cut flowers for indoor decoration their light starry character and great variety of tint make them unique; when cut and placed in water their freshness is maintained for a long period.

GERBERA JAMESONI HYBRIDA.

At the Exhibitions in London, Paris, and Berlin, the flowers of these plants have created a sensation 1 6

CLIBRANS' LARGE-FLOWERED SWEET PEAS.

SUPERB NOVELTIES FOR 1912.

Of the many new varieties of Sweet Peas that have been exhibited during the past summer, we have selected the following as being distinctive and likely to become valuable additions. As stocks of new varieties are strictly limited, we would appreciate orders being placed without delay.

- Per pkt.—s. d.
- DUPLEX SPENCER.**—Large waved flowers of true Spencer type, standard and wings rich cream pink, lemon keel. The greater number of the flowers have twin or triple standards. The blooms are produced on stout stems, carrying three or four flowers; the finest of all pink-flowered varieties for cutting and general decorative use 6d. and 1 0
- IRISH BELLE** (*Dream*).—Another fine Spencer of quite a new shade, a lovely rich lilac flushed pink, of a distinct soft tone throughout; a fine variety, producing three or four blooms on each stem 6d. and 1 0
- MRS. CUTHBERTSON.**—Standards clear rose-pink, wings white with a slight suffusion of pale rose, a delightful combination of colours. There is no doubt but that this variety will prove very popular 1 0
- PEARL-GREY SPENCER.**—Pearl or dove-grey suffused light rose, large size, and true waved form, borne three and four on a stem; a distinct and lovely new variety .. 6d. and 1 0
- RAINBOW SPENCER.**—Ivory-white, flaked and lightly streaked with rose, beautifully waved and of large size; a striking novelty, marking a great advance in the striped section. 6d. and 1 0
- ROSABELLE.**—Carmine and rose-red, the best of its colour, of large size and fine form, carried on long, stout stems; excellent in every way 1 0
- VERMILION BRILLIANT** (The most brilliant Iridescent scarlet Spencer yet introduced).—A glorious flower of the finest waved Spencer type. The standard, large, bold, and erect, together with the wings, is of intense scarlet, a brilliant colour and quite sunproof; flowers large, on stiff, stout, long stems, each carrying three or four blooms; a free growing, free blooming variety that will create a sensation. 6d. and 1 0

CLIBRANS' SUPERB SWEET PEAS.

The National Sweet Pea Society's Special Selections of Sweet Peas for 1912

Judging by the demand we have experienced since we first commenced to offer collections of Sweet Peas selected by the National Sweet Pea Society, it is evident they have supplied a want.

We again have pleasure in offering the Society's Selections, revised for 1912. The names of varieties included in each collection are contained in our large Seed List.

COLLECTION A.

24 Varieties for 10/6 post free, as selected by the N.S.P.S.

COLLECTION B.

15 Varieties for 6/6 post free, self colours ; as selected by the N.S.P.S.

COLLECTION C.

12 Varieties for 4/- post free, as selected by the N.S.P.S.

COLLECTION D.

12 Choice Varieties for 2/6 post free, as selected by the N.S.P.S.

COLLECTION E.

CLIBRANS' POPULAR GLADIOLI

(Autumn Flowering Varieties.)

These are perfectly hardy, and do well in any ordinary garden soil, but thrive best when planted in a sunny position in well-manured soil. Plant in March, each bulb 4 inches deep and 1 foot apart. During the flowering period give plenty of water and occasional applications of liquid manure.

BRENCHLEYENSIS.

Flowers brilliant scarlet; hardiest of all; splendid for borders.

Extra Selected Bulbs, per 1,000, 75/-; per 100, 8/6; per doz., 1/3

Usual size bulbs, per 1,000, 45/-; per 100, 5/-; per doz., 9d.

CHOICE SEEDLINGS (Hybrids of Gandavensis).

Strong flowering bulbs, from a splendid strain, in great variety of colour.

Per 100, 10/6; per doz., 1/6

CHILDSI.

The flowers are of great substance, frequently 6 to 7 inches across, in a great variety of colours.

Finest Mixed Hybrids, per 100, 7/6; per doz., 1/-

LEMOINE'S HARDY HYBRID SPOTTED.

Earlier and hardier than the Gandavensis section, colours rich and varied, with large blotches on the lower petals.

Finest Mixture of the above, per 100, 7/6; per doz., 1/-

NANCEIANUS (New Hybrids).

A superb new race of the Gandavensis class, of vigorous growth and enormous flowers, in varied colours.

Finest Mixed Hybrids, per 100, 9/-; per doz., 1/6

BEGONIA TUBERS (Clibrans' "Gold Medal" Strain).

SINGLES.

Crimson, White, Yellow, Bronze, Blush or Salmon, Pink, Dark Rose, Scarlet, 3/- per doz., 21/- per 100.

Mixed Colours, 2/6 per doz., 15/- per 100.

Extra Fine Selected, 6/-, 9/-, and 12/- per doz.

DOUBLES.

Choice unnamed Double Varieties, to colour, 1/-, 1/6 to 2/6 each, 9/-, 12/-, 18/- to 24/- per doz.

Mixed Seedlings, unbloomed, containing a large percentage of doubles, 3/- per doz., 21/- per 100.

CRESTED OR BEARDED.

Extra Choice Mixed, 4/- per doz.

CLIBRANS' LILIUMS.

Liliums stand unrivalled for the embellishment of the greenhouse, conservatory, or the open garden. They should be planted where they can remain for several years.

Each—s. d.

Clibrans' Lawn Mowers.

A few seasons ago we introduced the two undernoted Mowers. They met with instant success. Both machines have been well and carefully thought out, being designed specially for easy working, efficiency, and reliability. The materials of which they are manufactured are of the best, the workmanship of the highest class.

After one week's trial, we are prepared to take back and refund the purchase money of either of the two machines, should they not be found satisfactory.

The "Clibran."

CLIBRANS'

.. NURSERY ..

DEPARTMENT.

***450 Acres of Open Nursery,
5 Acres of Glasshouses,
At HALE :: :: CHESHIRE.***

ROSES.

Eight acres of land devoted to the cultivation of upwards of 200,000 Roses in all the best varieties, is a large area. We find, however, that it is not large enough to cope with the heavy demand we experience, season by season.

HARDY FRUIT.

Upwards of half-a-century's experience in the production of Fruit Trees and Bushes is placed at the disposal of our clients. The employment of specialists, together with the exercise of the highest skill and most careful attention to every detail, enables us to produce and offer Trees and Bushes of the highest quality and grade.

FOREST TREES.

Season by season we find ourselves compelled to enlarge the area of land devoted to the raising and cultivating of Forest Trees, Hedge and Covert Plants. Millions of the most useful subjects for timber production, shelter planting, covert and hedge plants are now growing in our nurseries, all in the best possible health and condition.

ORNAMENTAL TREES & SHRUBS.

Our stock of Trees, Shrubs, and Hardy Woody Plants have never been in better condition than now. Perfect development, well ripened, and splendidly rooted, correctly named, free from pests and disease, they cannot fail, if given ordinary care and attention, to give complete satisfaction.

HERBACEOUS AND ALPINE PLANTS.

It has been our aim to make our collection to include only those classes and varieties of plants that have a distinct garden value.

Six acres of land and a special staff of men are exclusively devoted to this Department, an interesting display of flowers being always in evidence in our Nurseries from Spring until Autumn.
